

LUTS Pathway

Primary care presentation of LUTS Male 18+

2WW Urgent referral if
 - prostate feels malignant on digital rectal examination (DRE) or
 - PSA level is above age specific reference range (consider factors which affect PSA)

If PSA raised in context of UTI, repeat PSA after 6 weeks to confirm if it is truly raised and whether further investigations are required.

PSA ranges
 Macmillan guidance: 40-49y 0-2.5mcg/L; 50-59y 0-3.5mcg/L; 60-69y 0-4.5mcg/L; 70-79y 0-6.5mcg/L
